

Synced Folder

Synced Folder Store, Share & Collaborate online

Does your business have a file storage, sync and share solution that increases mobility and collaboration? We at Interware recommend Synced Folder. A cloud based, business-grade storage, sync, and share solution that is simple to use and guarantees data security.

Enterprise Security

- 448-bit Blowfish Encryption and many more features that guarantee your data is safe

Infinite Revision Capture

- Restore deleted or changed files from as far back in time as you need

Mobile Access

- Freedom to access files from mobile phones across all operating systems (Android, Blackberry, Apple, Windows, Symbian and more)

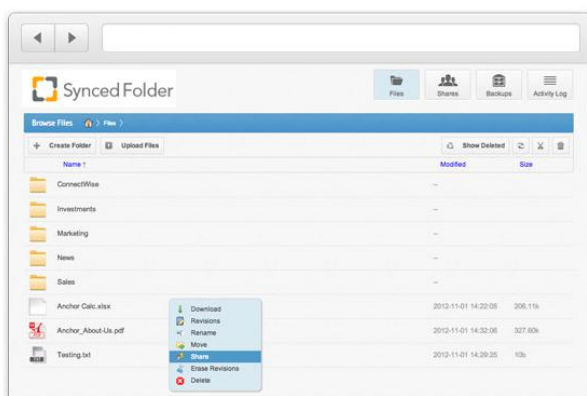

User Controls

- Set strict usage and access policies at company and user levels

User Friendly

Simple & elegant user interface

Sharing, editing, collaborating and restoring lost files from the cloud has never been easier. Synced Folder also offers a **drag and drop** feature for even greater convenience. The desktop and mobile application gives **direct access to your Synced Folder** through a folder on your hard drive.

Universal File Access

Powerful file sync for efficient collaboration

Sync across a range of stationary and mobile devices (Android, Blackberry, Apple, Windows, Symbian and more).

Synced Folder

User Controls

Centrally administered user dashboard

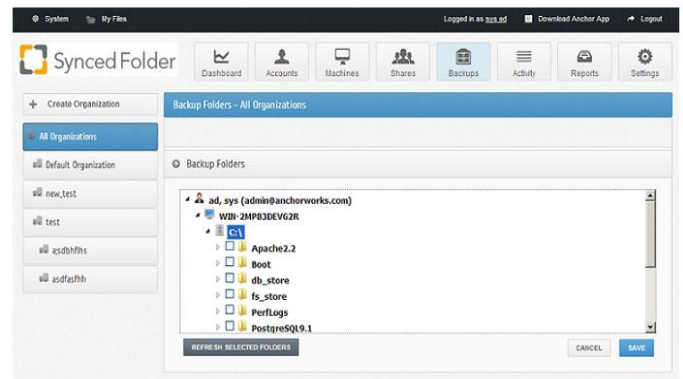

Administer all your users from one central, intuitive dashboard and set company-specific usage limits. Track data usage and gain access to comprehensive usage reports

Data Backup

Data restoration from any revision

Backup and archive your data so it may be used to restore the original when data is lost.

Why Synced Folder?

Why choose us over the competition?

- **Data security:** Most competitive file hosting services are not recommended for business networks. Usually all consumer data is secured by one encryption key. Synced Folder offers an unbreachable encryption technology that guarantees data security. In addition, information is stored at Interware's Network Operations Centre (NOC) located in Canada. This local oversight over the infrastructure further strengthens security.
- **Business functionality:** Most competitive file hosting services are designed for consumer use. There is no integration with your business environment or applications. Synced Folder lets you integrate with Microsoft Active Directory.
- **Visibility:** Most competitors offer limited access management and absolutely no reporting. With Synced Folder you have access to what employees are doing, data usage, revision histories of documents and much more.
